

Maritime IP-TV Platform

Features

Our IP-TV platform enables our clients to watch their favorite satellite TV channels wherever they are. It is now possible to watch Sky TV in the Caribbean and DirectTV in the Med through your VSAT terminal. We have a number of solutions, please contact us for details.

- Live satellite TV via VSAT, WiFi or 3G connection
- Store & Forward (time zone independent)
- Remote Editing (remove commercials before sending files).
- Recordings available on server for weeks
- Compatible with all Satellite TV systems
- Many channels offer EPG recording
- Compatible with Apple Frontrow media player
- Requires iSky Widget Version 1.4
- Satellite TV receiver with Firewire interface
- iLife video editing software
- EyeTV 3 software licence

Edit your recording before download
