

FEBRUARY PRODUCTS HIGHLIGHTS

360°

Braided cables

“Electric Rope” prevents your shore power cable becoming tacky, dirty and unpleasant to handle. No longer will sticky black residue blemish your pristine decks. Your shore power cable will finally become part of the boat unlike the industrial looking cable ill suited in the yachting world. We also produce data cables; e.g. Phone lines and satellite dish cables.

FLIR

Multi-Sensor marine night vision systems combining a thermal imaging and a low light camera

The FLIR M-Series combines a thermal imaging camera with a low light camera. It provides crisp, clear thermal imagery in total darkness and light fog or smoke. Packaged in a small, ultra-compact gimbal it is designed for the most demanding maritime applications. The FLIR M-Series is a perfect tool for night time navigation, shipboard security, man overboard situations, anti-piracy and many other applications.

CCTV iPure

CCTV Upgrade

Upgrade your existing analog cameras with our IP quad. CCTV footage is then available on any PC on the boat network. We can also supply IP cameras with power over ethernet (single CAT5 for power and video).

Open frame touchscreen

360 offers LCD open frame kits with a extremely versatile open-frame chassis that can be used for special mounting applications, especially in CCTV and marine monitoring area.

Flexible one box CCTV solution

Our new CCTV servers now combines Transmission with Telemetry Control and Recording into one platform so there is no need for additional hardware when integrating a comprehensive marine CCTV solution. The crew can access all cameras with simple touchscreens (no keypad required).
